Global Explanations

Get Started

```
>>> gam = GAM(local_path="local_attributions.csv",
               distance="spearman",
               k=2)

>>> gam.generate()
>>> gam.explanations
[[('height', .6), ('weight', .3), ('hair color', .1)],
 [('weight', .9), ('weight', .05), ('hair color', .05)]]

>>> gam.subpopulation_sizes
[90, 10]
```

Coming this Spring
